

# Annual Dental Conference 2024

## Embracing Realistic Dentistry

### Workshops and Masterclasses

#### Masterclass A

##### Shared Decision Making in General Dental Services

Participants will have to opportunity to learn how shared decision making can be approached using the DECIDE and BRAN tools using a clinical example relevant to General Dental Services.

#### Workshop B

##### Delivering Value Based Care in Hospital Dental Services (HDS)

Considering the main themes of Realistic Medicine and Value-Based Health and Care, participants will work together with facilitator(s) to discuss what they might be able do in their workplace and system in the short and long term to provide more value and realistic care. This workshop is targeted towards those involved in the delivery of care in Hospital Dental Services (clinical staff, managers and leaders) at all levels of the system. The outputs will inform a Dental Faculty Position Statement.

#### Workshop C

##### Delivering Value Based Care in Public / Community Dental Services

Considering the main themes of Realistic Medicine and Value-Based Health and Care, participants will work together with facilitator(s) to discuss what they might be able do in their workplace and system in the short and long term to provide more value and realistic care. This workshop is targeted towards those involved in the delivery of care in Public or Community Dental Services (clinical staff, managers and leaders) at all levels of the system. The outputs will inform a Dental Faculty Position Statement.

#### Workshop D

##### More Sustainable Dentistry

In this session participants will learn about initiatives being carried out to improve sustainability in other healthcare settings before discussing how they might be able to deliver more sustainable dentistry. The focus will be climate and environmental sustainability. This session is recommended for any participant.

#### Masterclass E

##### Shared Decision Making for Hospital and Public/Community Dental Services

Participants will have to opportunity to learn how shared decision making can be approached using

the DECIDE and BRAN tools using a clinical example relevant to Public/Community and Hospital Dental Services.

### **Masterclass F**

#### **Improvement Tools to Support the Delivery of Sustainable Care**

David McDonald, Head of Modernizing Patient Pathways Programme,  
Centre for Sustainable Delivery, NHS Scotland.

This masterclass will demonstrate examples of some value-based health and care improvement tools such as Patient Initiated Review, Opt-in and Active Clinical Referral Triage and show how they can be implemented. This Masterclass is recommended for those with hospital and public dental service roles both clinical and management.

### **Workshop G**

#### **Delivering Value Based Care in General Dental Services (GDS)**

Considering the main themes of Realistic Medicine and Value-Based Health and Care, participants will work together with facilitator(s) to discuss what they might be able to do in their workplace and system in the short and long term to provide more value and realistic care. This workshop is targeted towards those involved in the delivery of care in general dental services (clinical staff, managers and leaders) at all levels of the system. The outputs will inform a Dental Faculty Position Statement.

### **Workshop H**

#### **More Sustainable Dentistry – Repeat Session**

In this session participants will learn about initiatives being carried out to improve sustainability in other healthcare settings before discussing how they might be able to deliver more sustainable dentistry. The focus will be climate and environmental sustainability. This session is recommended for any participant.
